PROFILE

Automation QA Engineer with **3+ years of hands-on experience** building and scaling **UI and API automation frameworks** using **Playwright, Selenium, and REST Assured**. Proven record of **cutting regression time, reducing production defects, and enabling faster releases** through CI/CD-integrated testing. Strong in **JavaScript & Java**, Agile delivery, and real-world product testing.

CORE SKILLS

Automation: Playwright, Selenium WebDriver, TestNG

API Testing: REST Assured, Postman

Languages: Java, JavaScript

CI/CD & Tools: Azure DevOps Pipelines, Git, JIRA, Azure Boards

Performance: JMeter (Load & Stress Testing)

Testing Types: Functional, Regression, Exploratory, Cross-Browser, API, Performance

PROFESSIONAL EXPERIENCE

SmartHatch Technologies , Kochi

July 2025 – Present

- Testing **CMS workflows and incident management systems** used in real-world operational environments.
- Designed and executed **automation scripts with Selenium + TestNG**, improving validation of critical user flows and reducing repetitive manual effort.
- Performed **API automation using REST Assured**, validating request/response payloads, headers, authentication, and workflow rules.
- Executed **end-to-end manual testing** (functional, regression, exploratory, cross-browser) across web and mobile platforms.
- Identified, logged, and tracked defects in **JIRA**, driving fixes through retesting and regression verification.

- Built and maintained **scalable automation frameworks using Playwright**, accelerating regression cycles and improving test reliability.
- Automated **critical business flows** across multiple web applications, increasing confidence in every release.
- Conducted **performance testing with JMeter**, validating application stability under high load.
- Integrated automated test suites into **Azure DevOps CI/CD pipelines**, enabling continuous testing and faster release cycles.
- Actively collaborated with developers and product owners in **Agile/Scrum** teams for sprint planning, defect triage, and story refinement.
- Produced **test summary reports and quality metrics** (coverage, defect trends) to support release decisions.

IMPACT AND ACHIEVEMENTS

- **Reduced production defects by ~70%** through focused exploratory testing and automation of high-risk areas.
- **Improved manual testing efficiency by ~30%** via better test design and early defect identification.
- Helped achieve **~95% test coverage** on high-priority modules using a balanced manual + automation approach.

PROJECTS

1. Incident & Call Management System

Technologies: RestAssured, Java

- Performed **API-only testing** for incident lifecycle, escalation rules, and backend workflows.
- Validated integrations between **incident workflows and call-center logs**.
- Reported and tracked defects in JIRA, supporting faster stabilization of releases.

2. CMS Projects

Technologies: Selenium, REST Assured, TestNG, Java

- Tested **content creation, approval, scheduling, and publishing workflows** end to end.
- Automated UI validation for core CMS flows and verified **role-based content visibility**.
- Executed API testing to validate content retrieval and publishing logic.

3.Eventzet – Event Hosting and Ticketing Platform

Technologies: Playwright,Postman,Jmeter

- Automated **event creation, ticket booking, and payment flows.**
- Performed API testing and performance testing to ensure platform scalability.
- Supported quality gates by logging and verifying fixes in Azure DevOps.

4.Cost Report- Financial Document Management

Technologies: Playwright

- Tested document upload, download, and access control for financial records.
- Combined **manual, API, and automation testing** to validate data integrity.

EDUCATION

- Bachelor of Computer Applications — Manipal University Jaipur (*2024 – Present*)
- Diploma in Wood & Paper Technology — Govt. Polytechnic College, Kannur (*2017 – 2020*)

CERTIFICATION

Software Testing Certification — NACTET (Luminar Technolab, Kochi)
